

STAT1 SCEPTRE vs Seurat With Pvalue QC Summary

2023-04-04

Introduction

In this writeup I will change the method of QC for the CHIP-seq data to be such that peaks are only called if they are in the top α percentile of peaks with respect to the pvalue reported. I will return the odds ratios that SCEPTRE and Seurat give with respect to the post-QC chipseq data. For more information such as the actual number of discoveries, see “STAT1-analysis-pval-QC-individual”.

Table 1: Enrichment odds ratios, comparing to ChIP-seq target assignments with changing quantile threshold

Ground truth \ Method	Method			
	SCEPTRE	Seurat	SCEPTRE-pval	Seurat-pval
0.1	1.359	1.275	0	0
0.25	1.302	1.225	0	0
0.5	1.254	1.159	0	0
0.75	1.310	1.239	0	0
